

Arpin is at the forefront of sustainable moving, blending innovative solutions with a deep commitment to environmental, social, and governance (ESG) principles. Our mission is simple yet profound: to leave the world better than we found it.

"We go beyond what is typically expected, aligning with your ESG values."

*Peter Arpin, President,
Arpin International Group*

Moving For A Cause

Arpin's "Moving For A Cause" campaign empowers employees to support causes they care about by choosing between one of five global charities Arpin will donate to on their behalf—a "Thank You" for moving with us that reflects our commitment to ESG.

Arpin Strong

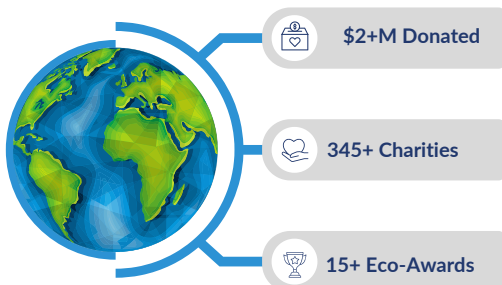

Founded in 2013 after the Boston Marathon bombing, Arpin Strong is a non-profit dedicated to making a difference. It supports causes like homelessness, food insecurity, veteran aid, disaster relief, and more. Since its inception, Arpin Strong has donated over \$2+M to 345+ charities worldwide, demonstrating our dedication to positive change.

Seeds Of Hope: Cultivating Resilience And Global Impact

We empower our clients to make a global impact through purposeful moving:

- In Malawi, we uplift women by providing them with life-changing skills, education, and the tools to start their own sewing and soap-making businesses. This helps them earn a sustainable income to support their families and transform their futures.
- When Cyclone Freddy hit, we responded swiftly—providing essential supplies, clean water filtration systems, and planting new crops to restore hope and fight hunger.
- At the 2023 LACMA Convention in Argentina, we didn't just attend—we rolled up our sleeves, built homes for families in need, and turned impact into action.

Purpose-Driven Moving Experiences By The Numbers

Development of Environmental Programs And Initiatives

- In partnership with the Philippine government, we're building an Ecological Sanctuary to restore biodiversity and connect people with nature. We're also working with local labor to ensure that conservation aligns with the community's needs.
- The Eco-Sanctuary will feature a peaceful Grotto, a Wonder Garden for children, and stations guiding visitors through the story of life on Earth. Guests can camp along the Pilgrim Trail or stay in eco-friendly, A-frame guest houses.
- Ongoing projects include building a spillway and greenhouse, educational conservation programs, and sustainable farming efforts.

Assessment of Our Environmental Impact

- Arpin sets the standard in sustainability for the moving industry, being the first to complete the ISSP's S-CORE™ Sustainability Assessment. A Global Sustainability Committee was then established to ensure ongoing environmental improvements.
- Our commitment to ESG principles is central to our operations. With the Worldfavor platform, Arpin accurately tracks and reports ESG data, evaluates supply chain risks, and shares information with stakeholders to ensure collective sustainability efforts.

Partnering with Arpin, an award-winning leader in ESG, allows organizations to align with these values, gain ownership of positive impacts, and effectively manage risk.

Karen Wilde

We at Wilde Relocation select our third-party suppliers very carefully, not only about quality and fulfilling our KPIs but also in respect to our own internal standards of sustainability and social commitment. With Arpin we can tick all the boxes.
